Dear Sir/Madam,

I am currently a student in the BTS SIO program at the Lycée Saint-Rémi in Amiens, and I am seeking an internship from May 31 to June 25, 2027. Eager to develop my skills and gain practical, hands-on experience in the field of IT, I would like to submit my application to join your company during this period.

I am passionate about web development and programming, with a particular interest in the design and integration of websites. During my studies, I have worked with HTML and CSS, utilizing tools such as Visual Studio Code and Notepad++. I also pursue independent learning through online courses, which reflects my curiosity and constant drive to improve.

My previous professional experiences have helped me develop skills valuable in any workplace, including information research and analysis, professional communication via email and telephone, and managing relationships with various stakeholders. These experiences have taught me to be diligent, organized, and adaptable to the tasks I am assigned.

Joining your organization would provide me with the opportunity to apply the knowledge I have gained during my BTS program, while gaining a concrete understanding of how a professional environment operates. Highly motivated, curious, and eager to learn, I would be delighted to contribute to the tasks entrusted to me and to grow alongside your team.

I would welcome the opportunity to discuss my application with you further, and I thank you in advance for your time and consideration.

Yours faithfully,

Nohan Leroy
